

## Paper Penguin Craft

You will need:

- black, white, and orange construction paper
- gluestick
- scissors
- patterns
- 4 yellow feathers

1. Copy the patterns using the enlarge feature on a copying machine or draw your own.
2. Roll a full sheet of black construction paper into a cylinder, gluing the short ends together. This will be the penguin's body.
3. Cut out the arms on black paper, the eyes and belly on white, and the beak and feet on orange.
4. Glue the pieces onto the appropriate part of your penguin body.
5. You will want to fold over the very end of the wing and feet pattern pieces which will connect to the body so that you have a surface to glue. Fold the beak in half and glue one side to the body.
6. Glue yellow feathers to the side of your penguin's head and call it a Macaroni!
